

KiteTender 400

The Kitetender 400 has been specially developed for sailing with kites.

Since masted sailboats have completely different forces acting on the hull (heeling and pitching) the Kitetender planing surface and volumes needed to be different.

With the use of racekites, Kitetender is achieving speeds up to 20 knots.

The Kitetender 400:

- Most accessible open kiteboat ever produced.
- Easy to hook in any kite.
- Once the kite is flying you are ready to start. When kitesurfers can't be pulled out of the water in light winds, you will be sailing with your Kitetender .
- No board skill required. Once you have Kite control, you are ready to go.
- It can be easy and relaxing when using small kites.
- Go extreme in more wind or bigger kites but make sure that the crew is competent.
- For sailors it's the fastest accelerating boat (without hydrofoils) ever!
- A relatively new sport which will appeal to more active sailors seeking new challenges
- Can be easily launched and recovered from any beach or Coastal location.

KiteTender 400

Specifications and standard delivery;

- ✓ Length 4,40 m
- ✓ Beam 1,4 m
- ✓ Weight 85-90 kg
- ✓ Build Vacuum infused vinylester sandwich glass fibre construction
- ✓ Design Peter Schermer NL
- ✓ Calculations Peter Bosgraaf Yacht design NL (CE- C coastal norms)
- ✓ Parts
